

ESI Ditto™

Take your Cloud PBX wherever you go.

Estech Systems, Inc. (ESI) is a premier provider of on-premises and cloud-based unified communications solutions for small to medium-sized businesses (SMBs). ESI develops uniquely integrated and innovative solutions, enabling certified partners to offer a portfolio of affordable and differentiated VoIP communications that enhance the user experience.

WE MAKE IT EASY TO COMMUNICATE

ESI Ditto™ - is the companion application for the ESI Cloud PBX.

With ESI Ditto, users can utilize critical features of the Cloud PBX while away from their primary office location. Features include:

Call Hand-off: roam in and out of the office while on a call without service interruption.

Contacts Aggregation: view your contacts from synced accounts on your device.

Multiple Device Support: access the features that you know and love on your tablet AND smartphone, all on a single account.

Single Number Reach (SNR): don't worry about giving your mobile number out ever again! Calls to your work DID can be automatically routed to the destination of your choice!

Voice Mail Notification: no more calling in to check messages while you're away. You'll be notified as soon as the messages are left for you.

Re-route Calls: easily set-up Call Forwarding or Do Not Disturb (DND) from anywhere!

EXTEND YOUR ESI CLOUD PBX FEATURES BEYOND THE OFFICE!

BEING OUT OF THE OFFICE DOESN'T MEAN THAT YOU HAVE TO BE OUT OF TOUCH.

ESI Ditto was designed specifically to allow ESI Cloud PBX customers to extend their unified communications features and functionality to a user's mobile device. Whether using a smartphone or a tablet, on-the-go users no longer have to be tied to a desk to experience the ease and benefits of unified communications. Take critical features with you wherever your business leads you!

Organizations that want to offer a truly mobile work environment only do so when the same benefits employees have in the office are available remotely. By embracing mobile VoIP options, companies can offer their workers access to the same office lines and features used in-house directly on their smartphones or mobile devices.

ESI Ditto takes the features that users love about the ESI Cloud PBX and places them in a unified, mobile application. ESI Ditto is intended for use with Cloud PBX mobile or premier seats. Available features include:

INTELLIGENTLY INTEGRATED.

ESI Intelitouch™ is the unique "handshake" between the phones and the desktop interface that only ESI can provide. This advanced integration between SIP endpoints and the web-based dashboard delivers a truly unified communications experience.

HOLD, TRANSFER & PARK - ANYWHERE!

Just because you're away from the office doesn't mean that you have to lose your advanced features. Easily transfer, park and place calls on hold directly from your mobile device.

ON-THE-FLY CALL RECORDING.

With the touch of a single button, record calls from your mobile device and save them directly onto your organization's network.

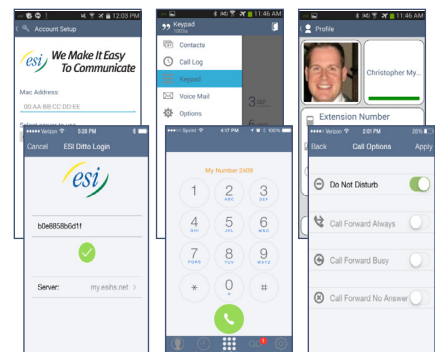

ANDROID™ & iOS DEVICE SUPPORT.

Supported platforms for this application are Android (4.0 or later) and iOS (7.0 or later).

WHAT'S NEW IN ESI DITTO 2.0?

The latest smartphone application update features a streamlined interface with a new look and new navigation.

For tablets, the update also provides a new look and feel, in addition to a split-screen layout that allows for rapid access to what you need. 7" & 10" tablets are supported.
